Sunrise Solar Solutions Takes the Lead in Commercial Installations with Two New Solarize Commercial Wins: Solarize Greenburgh and Solarize Peekskill

Westchester's Premier Solar Installation Company Soars to the Top with 9 Solarize Residential and Commercial Contracts

[Sunrise Solar Solutions](#) has just won two new commercial Solarize contracts, totaling nine Solarize contracts for the Briarcliff Manor-based premier solar installation company covering all of Westchester and the Hudson Valley, as well as Connecticut and the boroughs of New York City. Sunrise Solar is now the designated commercial solar installer for both Solarize Greenburgh and Solarize Peekskill. Sunrise has also been named the designated residential and commercial installer by several other Solarize programs throughout the region including Solarize Bedford-Mount Kisco, Solarize Cortlandt-Croton, Solarize Larchmont-Mamaroneck, Solarize Nyack Plus (including all of Rockland County), Solarize Rye Brook, Solarize Hastings-Dobbs Ferry and Solarize Wappingers.

Solarize is a community outreach program that uses a discounted pricing structure, town-supported education and outreach to offer quality, affordable solar electric systems to property owners. Sunrise was chosen as the installer best suited to serve business owners through the Solarize program's competitive bidding process. This process required that all solar contractors be thoroughly vetted by the state and local agencies, have a stellar reputation, a commitment to the community and prove that they are dedicated to best practices.

Sunrise Solar Solutions Solarize Commercial...pg. 2

Sunrise Solar Solutions has soared to the forefront of commercial solar innovation, catapulted by many successful projects including the recent completion of the first Community Distributed Generation (CDG) solar energy system in the Hudson Valley – paving the way for commercial solar customers to sell energy to residents under the new "shared solar" arrangement (formally called "Community Distributed Generation") -- now allowed in New York State where the solar electricity from commercial buildings directly reduces the electric bill in the homes of nearby subscribers.

Sunrise Solar Solutions created the first commercial solar installation for the Town of New Castle, which won them an award from the New Castle Sustainability Committee. And, the company was recently named the designated commercial installer for the Solarize Wappingers program.

“For business owners, the economics have definitely tilted in favor of solar -- so the demand is growing rapidly,” said Doug Hertz, president of Sunrise Solar Solutions. He added that Sunrise is enthusiastically poised to meet that demand. “We are excited about all the advances and innovations made with solar and the many new opportunities available to businesses and homeowners alike.”

“These are some really advanced, really challenging residential and commercial projects that other solar companies might shy away from, but for us, they are a very natural progression from the work we’re already doing and enjoying. So that is a big part of my vision for the future,” he continued.

Sunrise Solar Solutions has installed more than 428 installations in homes and businesses throughout Westchester, Rockland and the entire Hudson Valley – and was recently named the company that ***“leads the way in the state-wide solar movement.”***

“We are known as a top-tier residential and commercial installation company and guarantee our clients that they will receive the highest quality materials, the best possible service and pricing, and the benefit of our experience and hands-on customer service approach,” says Hertz.

[Sunrise Solar Solutions](http://www.sunrisesolarllc.com), headquartered in Briarcliff Manor, NY, is the largest locally-owned and operated solar company in Westchester, and works across Rockland, Dutchess, Putnam and Orange counties, and throughout the Hudson Valley.
